

Training ETS in the Netherlands
Wiro Gruijters Programme manager AZN

Programme

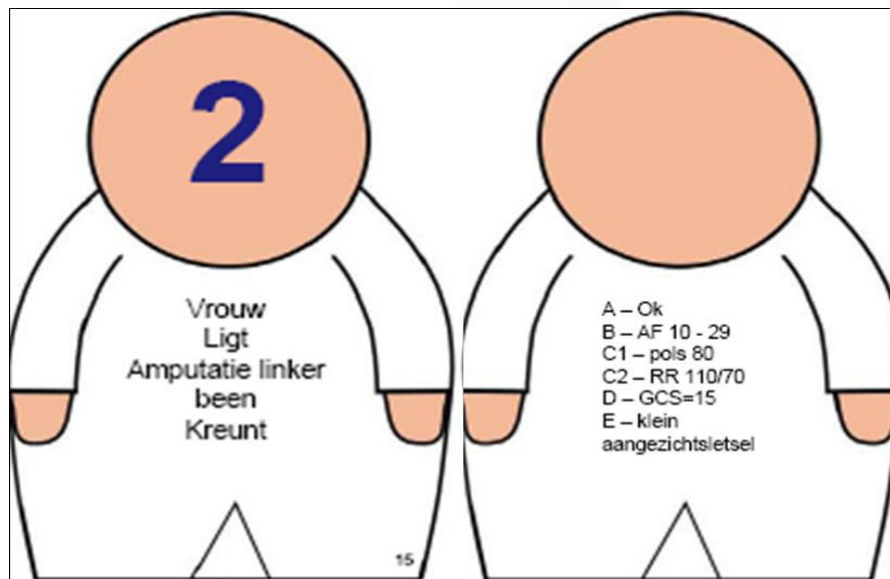

- **Emergo Train System (ETS)**
- **Introduction**
- **Exercise/education**
- **Outcome**

ETS system

- **Emergotrain is a swedish designed system developed in 1990 as a disaster simulation exercise and training system**
- **It is not a course in disaster medicine itself and not a concept that tells how to handle a major incident**
- **The system is simple to use and not requiring sophisticated equipment**
- **It is based on magnet symbols on white boards representing patients, staff and resources**

ETS system

- Stickers are used to show potential interventions
- Each patient has some basic information on the front to tell you what you can see about the patient

ETS system

- **Its a tool**

Right to exist

- **Disasters:**

- **Hercules**

- **Bijlmer**

- **Enschede**

- **Volendam**

- **Bottleneck coordination**

Goal

- **Stimulation: training and education**
- **for training- mono/multi- basic/advanced-hospital/prehospital**
- **The emergo-train system is used as a training tool for decision making in complex emergencies tot plan and manage the response to a major incident**

Target groups

- **Hospital**
- **Traumacentre- medical emergency team**
- **Ambulance teams**
- **Dispatchcentre**
- **Family doctors**

Implementation in the Netherlands

- **2001 Test Limburg**
